Mechanicam vero duplicem Veteres constituerunt: Rationalem *quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique* Mechanica *nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut* Mechanica *omnis a* Geometria *ita distinguatur, ut quicquid accuratum sit ad* Geometriam *referatur, quicquid minus accuratum ad* Mechanicam. *Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.* NEWTON

La généralité que j'embrasse, au lieu d'éblouïr nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité. EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum. LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 29

ADAMS, R. A., The Rellich-Kondrachov Theorem for Unbounded Domains . 390

BOHL, E., An Iteration Method and Operators of Monotone Type 395

BOTTEMA, O., Free Oscillations of an Infinite String 325

BOWEN, R. M., On the Stoichiometry of Chemically Reacting Materials . . . 114

CESARI, L., Multidimensional Lagrange Problems of Optimization in a Fixed Domain and an Application to a Problem of Magnetohydrodynamics . . 81

COLEMAN, B. D., & M. E. GURTIN, Corrections to our Paper "Waves in Materials with Memory III, Thermodynamic Influences on the Growth and Decay of Acceleration Waves" 401

COLEMAN, B. D., & V. J. MIZEL, On the General Theory of Fading Memory 18

COLEMAN, B. D., & V. J. MIZEL, On Thermodynamic Conditions for the Stability of Evolving Systems 105

DAFERMOS, C. M., On the Existence and the Asymptotic Stability of Solutions to the Equations of Linear Thermoelasticity 241

DUNWOODY, N. T., & I. MÜLLER, A Thermodynamic Theory of Two Chemically Reacting Ideal Gases with Different Temperatures 344

ERDÉLYI, A., Approximate Solutions of a Nonlinear Boundary Value Problem 1
